# STATEMENT

An IT with more than two years of experience in application development, website development, and implementation, I am highly creative and tech-savvy. I am a fast learner and I can quickly research new technology in many ways. I am able to work well in a team-oriented environment and I have many experiences in cooperation as well. My aim is to become an expert in the field of Information Technology within my area of specialization.

## TRAN PHI ANH
### FRONT-END DEVELOPER

📞 (+84) 941404225          ✉ phianh.dev@gmail.com

🎂 01/01/2000              📍 DaNang, VietNam

## Education

2018-2022

**FPT University**

Very good Bachelor of Software Engineering in Information Technology

## Language

Native in **Vietnamese**

Intermediate in **English**

## Interested

Technologies        Developing

Crypto              Badminton

Piano

## Honors Awards

Two years at excellent students

## Technology Skill

**1. Front-End**

- 2.5 years experience and proficiency HTML, CSS, SASS, Javascript/Typescript.
- 2.5 years experience proficiency with ReactJs, Nextjs
- Worked with expertise in Angular, and expertise in React Native.
- Experience in setting up environments, debugging, solving problems.
- +2 year experience with libraries like Ant Design, Bootstrap, Tailwind Css, etc.
- Responsive devices

**2. Backend**

- Understanding Nestjs, Express, Apollo Server, Spring boot
- Understanding some principles SOLID, DRY and programming techniques like OOP, API/REST, GraphQL, Apollo Server, and Application Developing.

**3. Database**

- Understanding MySQL, MSSQL, MongoDB.

**4. Other**

- Understanding CI/CD process, Docker, VPS
- GIT, tool support git like tortoisegit, sourceTree.

## Work Experience

**FPT Software | September 2021 - February 2023**
*Front-End Developer*

**Corize Inc Vietnam  | March 2023 - Present**
*Front-End Developer*

# PROFESSIONAL EXPERIENCE

### 1. Accounting HRM | FPT Software company

- Website/ System: supported company's customer recording, imported and exported information about the salary for employee,, provided information about the financial position.

  *Role: Front-End Developer    Team Size: 15        Project Type: Company - Outsource*

- Web application/ System: sell product and design them

  *Role: Front-End Developer        Team Size: 10        Project Type: Company - Outsource*

- Responsibilities: Defined requirements and estimated tasks for each sprint. Built UI following figma, developed base on the story, developed features and fixed bugs. Reviewed code for other members. Implemented unit test and integration test.

- Technical: Nextjs, ReactJs, Nestjs, Typescript, Docker

# Registration

Dear Sir/Madam,
Thank you for taking the time to read my description and background. I hope that you will give serious consideration to my application for the job. Regarding my skills, I guess some of your expectations may not be met for me, as they aren't usually the focus of my work. If necessary, it will require training time and as a fast learner, I can make sure that you do not have to worry about that. One final thing I want you to know is that I am always willing to study and practice more in order to become the best version. I find your company/team a suitable place for me to develop and make a contribution. Therefore, I hope to have the opportunity to work and dedicate myself to bringing value to your company and your team as well.
